February 26, 1990

Dr. Harmon C. McAllister, Jr.
Research Director
The Council for Tobacco Research
U.S.A., Inc.
900 Third Avenue
New York, NY 10022

Dear Dr. McAllister:

The Twentieth Anniversary Gordon Research Conference on Drug Metabolism will take place at the Holderness School in Plymouth, New Hampshire during the week of July 16-20, 1990. A copy of the program is enclosed and application forms will be available in the March 2 issue of *Science*. I hope that you or your colleagues will be able to attend this special conference.
In recent years financial support from public agencies has not fared well. Fortunately, industry has been very supportive. I hope that this trend will continue and support from your organization will be greatly appreciated. The Gordon Conference Center address is listed below.

We hope to make this a distinctive conference by focusing on the future rather than looking back at the past 20 years of Drug Metabolism growth and development. Topics will include the use of transgenic animals, biosensors for real time analysis, and future developments in mass spectrometry. The issue of chirality in current drug development will be examined in depth, and a session dealing with pharmacokinetics will be presented.

Please contact me if you wish additional information, or if I can answer any questions regarding the conference. Phone: (203)441-4744 Fax: (203)441-4998.

With best regards.

Sincerely,

Sanford K. Figdor
